01

Who We Are

Solar development and construction company based in Israel

Navitas Energy is an Israeli renewable energy company specializing in the development, financing, engineering, procurement and construction (EPC) of large-scale solar photovoltaic power plants.

With over 80 MW developed and 380,000 panels installed, we operate in Israel and expand across Eastern Europe and LATAM.

Vertical EPC Integration

Development
Site identification & permits

Engineering
Technical design

Procurement
Tier-1 equipment

Construction
Installation & commissioning

O&M
Monitoring & maintenance

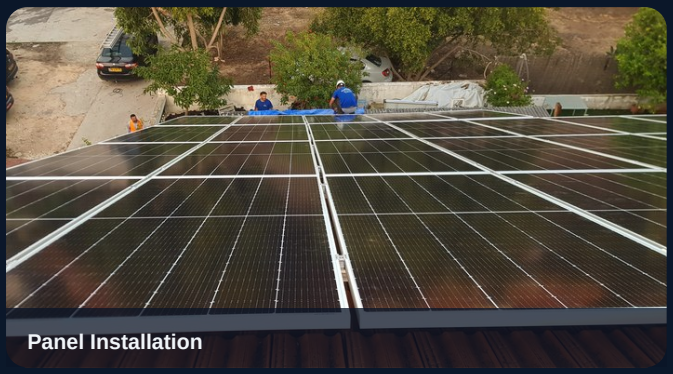
Technology Partners

- SolarEdge
- Huawei
- JA Solar
- Jinko Solar
- LONGi
- Sungrow
- SMA
- ABB

02

Projects in Israel

Over 80 MW developed across commercial and industrial rooftops



Panel Installation

Array solar completado

Estructura de montaje

Logística Jinko Solar

80+	380K	50+	6+
MW	Panels Installed	Commerci	Años

Commercial Rooftops
Factories, warehouses, shopping centers

Solar Fields
Utility-scale plants from 1-50 MW

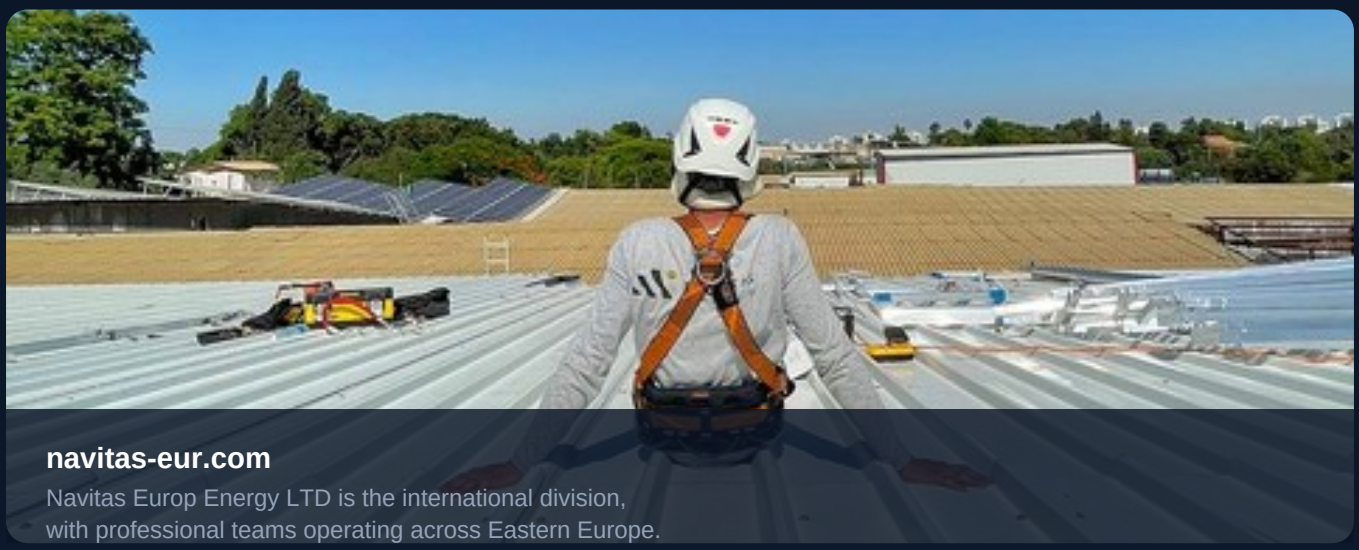
Energy Storage
Hybrid solar + battery systems

EV Charging
Fleet charging infrastructure

03

European Expansion

NAVITAS Europ Energy LTD — Eastern European Operations



navitas-eur.com

Navitas Europ Energy LTD is the international division, with professional teams operating across Eastern Europe. We develop utility-scale solar and storage projects.

Markets

Romania, Bulgaria, Serbia, Greece — high irradiation & favorable regulation

Green Deal

EU subsidies, REPowerEU — accelerating solar adoption

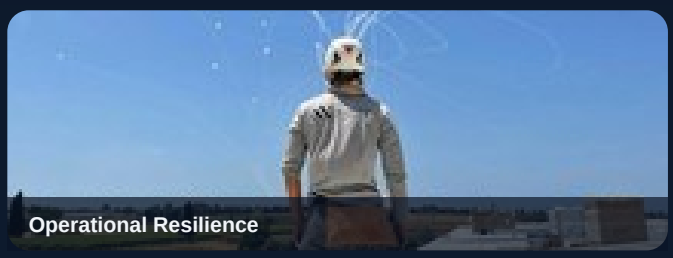
Partners

Alliances with local developers and contractors

Pipeline

Utility-scale plants with integrated storage

Field Fabrication



Operational Resilience

04

Panama — LATAM Entry

Solaris Panama: AI-powered solar analysis for C&I market

Navitas' first operation in Latin America.
AI tools to identify and close commercial solar projects under Law 417.

AI Tools

Roof Scanner

Satellite detection + A-D grading

AI Research

7 data sources + confidence scoring

Calculator

IRR, NPV, LCOE, 25-year projections

AI Proposals

Claude AI generates 8-section proposals

Strategic Value: Panama validates the LATAM model

Argentina is the natural next step in this strategy.

05

Solari Argentina — Your Solar Project

International backing for your solar energy investment

80+	380K	6+	3
MW	Panels	Years EPC	Continents

What We Deliver

- **Global Experience**
  +80 MW built in Israel & Europe backing every project
- **Tier-1 Equipment**
  Jinko/LONGi panels, SolarEdge/Huawei inverters — real warranties
- **Turnkey EPC**
  Design, engineering, installation & commissioning — all included
- **24/7 Monitoring**
  Remote production tracking & real-time fault alerts
- **Legal Compliance**
  Full management under Law 27.424 & utility grid connection

Costs & Returns

Residential
5-10 kWp
$1,750/kWp
Payback: 3-5 years

Commercial
50-500 kWp
$1,400/kWp
Payback: 2.5-4 years

Industrial
500+ kWp
$1,200/kWp
Payback: 2-3 years

Coverage across 17 provinces with full service

06

Leadership

Founder & CEO of Navitas Energy

KT

Kaniel Turgeman

CEO & Co-Founder — Navitas Energy LTD

k@kanielt.com

- Founded Navitas Energy in Israel at age 23.
- Led the development and construction of +80 MW in solar projects.
- Expanded operations to Eastern Europe (Romania, Bulgaria, Serbia).
- Launched Solaris Panama as first LATAM operation.
- Built in-house CRM + AI software platform for solar management.
- Hands-on experience in EPC, financing & regulation across 3 continents.

Global Strategy

A proven model replicated across new markets

ISRAEL
- 80+ MW

EUROPE
- Expanding

PANAMA
- Developing

ARGENTINA
- Next

Expansion Model

→ Israeli EPC technology and experience as foundation
→ In-house software platform + AI tools
→ Local partner in each country for execution and sales
→ Replicable model: Israel → Europe → Panama → Argentina
